

KINGPINLESS STYLE 51 SERIES

FEATURES

Swivel Section: High alloy swivel section is precision machined to accommodate 3/8" diameter ball bearings. Swivel sections are through hardened for durability.

Legs: 1/4" x 2" steel, formed and continuously welded inside and outside to the yoke base.

Axle: 1/2" diameter.

Lubrication: Pre-lubricated before shipping.

Wheels: 4" to 8" diameter wheels are available with straight roller bearings or ball bearings for ease in rolling.

Finish: Clear zinc plating.

APPLICATIONS

Excellent for light powered applications, bakery dough troughs, portable work benches, platform trucks, tow lines, utility carts, tooling fixtures, scrap metal carriers, drywall dollies, gantry cranes, automated guided vehicles, fiberglass lay-up molds, and other applications.

BENEFITS

The 51 Series kingpinless style swivel bearings act as both load and thrust components to lock the swivel section together and distribute the load over a larger area. The hardened swivel sections and formed and welded legs provide the strength and durability necessary for use in applications where constant swiveling under load is necessary.
